

## Bently Nevada products and the year 2000

**B**ENTLY NEVADA CORPORATION is committed to providing you with products that provide lasting value, as well as an upgrade path to newer products that provide additional value.

Much has been written recently about the problems that software (and hardware) will have when the year changes to "2000" and for the year 2000 leap day. Bently Nevada will make our current Microsoft® Windows NT™ and Microsoft Windows 95 software offerings completely Year 2000 compliant. In addition, any 3300 Series, or 3500 Series Monitors or Data Manager® Series communication processors, which may have clocks in their design,

will also be supported.

Bently Nevada software that was designed to run on operating systems other than Windows 95 and Windows NT will not be tested nor supported for year 2000 compliance. The one exception will be ADRE® for Windows which will be made Year 2000 compliant.

Some of our older products may be subject to Year 2000 problems. Please contact your nearest sales representative for more information. More information on Bently Nevada products and the Year 2000 can be found on our website - [www.bently.com](http://www.bently.com)
